

PoolSide Water Quality System with Digital Controls

New for 2009 our innovative, pre-plumbed, pre-wired Water Quality System greatly simplifies both the electrical and plumbing required, reducing the time and cost of your pool installation. User friendly computerized controls allow you to set the

water temperature and control the lights and jets. A handy waterproof remote turns the swim current on and off and regulates speed. The super efficient circulating pump not only saves energy but is also whisper quiet.

Water Quality System

Our sophisticated controller/heater comprises the heart of the system and constantly monitors water flow and temperature to ensure an optimal swimming environment.

Pool Side Digital Controls

Fully integrated digital controls for the heater, circulating pump, optional lights, and hydrotherapy jet.

Swim Pace Display

Our optional 7" digital swim pace display is easy to read without glasses and mountson any surface.
